Sun Protection

Sunlight may permanently damage the skin and cause skin cancer. What's more, most of wrinkling, roughening, and freckling that appears on your face, hands, and arms come from sun damage, not age. To protect yourself against the sun's harmful rays, wear SPF 30 or higher everyday and look for sunscreens with zinc oxide, titanium dioxide, or avobenzone. Anti-oxidants such as Vitamin C will also help prevent additional sun damage.
